

# Civil Economy: Another Idea Of The Market

Civil economy is a new economic model that is based on the idea of cooperation and reciprocity, rather than competition and self-interest. It is a way of organizing economic activity that is more sustainable, equitable, and democratic.

Civil economy is based on the belief that the economy should be a means to serve the needs of the community, rather than an end in itself. It emphasizes the importance of social values such as cooperation, solidarity, and sustainability.

Civil economy is not a new idea. It has been practiced in various forms throughout history, and there are a number of contemporary examples of civil economy initiatives. However, it is only recently that civil economy has begun to be recognized as a distinct economic model.

There are a number of key principles that underlie civil economy. These principles include:

- **Cooperation:** Civil economy is based on the idea that people are more likely to thrive when they work together. It emphasizes the importance of cooperation and collaboration, rather than competition.
- **Reciprocity:** Civil economy is also based on the idea of reciprocity. This means that people should be rewarded for their contributions to the community, and that they should also be willing to contribute to the community without expecting anything in return.
- **Sustainability:** Civil economy is committed to sustainability. It emphasizes the importance of protecting the environment and ensuring that future generations have access to the resources they need.
- **Democracy:** Civil economy is a democratic economic model. It is based on the idea that everyone should have a say in how the economy is run.

There are a number of benefits to adopting a civil economy model. These benefits include:

- **Increased social cohesion:** Civil economy can help to increase social cohesion by fostering cooperation and collaboration. It can also help to reduce inequality and poverty.
- **Improved environmental sustainability:** Civil economy is committed to sustainability. It can help to reduce pollution, protect biodiversity, and mitigate climate change.

- **Increased economic resilience:** Civil economy can help to increase economic resilience by diversifying the economy and reducing dependency on fossil fuels. It can also help to create more jobs and businesses.
- **Greater democracy:** Civil economy is a democratic economic model. It gives everyone a say in how the economy is run.

There are a number of examples of civil economy initiatives around the world. These initiatives include:

- **Community-supported agriculture (CSA):** CSA is a model of agriculture in which consumers buy directly from farmers. This helps to support local farmers and reduce the environmental impact of food production.
- **Worker cooperatives:** Worker cooperatives are businesses that are owned and operated by their employees. They are often more democratic and equitable than traditional businesses.
- **Community land trusts:** Community land trusts are non-profit organizations that own land for the benefit of the community. They can help to ensure that land is used for affordable housing, community gardens, and other public purposes.
- **Time banks:** Time banks are networks of people who exchange their time and skills. This can help to build community and reduce the need for paid labor.

Civil economy is a new economic model that is based on the idea of cooperation and reciprocity. It is a way of organizing economic activity that is more sustainable, equitable, and democratic. Civil economy has a

number of benefits, including increased social cohesion, improved environmental sustainability, increased economic resilience, and greater democracy. There are a number of examples of civil economy initiatives around the world, and the movement is growing.

Civil economy is a viable alternative to the current economic model. It is a model that is based on the values of cooperation, solidarity, and sustainability. Civil economy is a model that can help to create a more just, equitable, and sustainable world.
